

Nick Prokesch

Full-Stack Software Engineer

Austin, TX · Remote OK nick@prokes.ch nick.prokes.ch github.com/prokizzle linkedin.com/in/nickprokesch

Full-stack engineer across frontend, backend, DevOps, and infrastructure. Working in every layer is what tells me which layer a problem actually lives in, so the effort goes where it pays off.

Experience

Clover Sport

Senior Cloud Software Engineer

2024 – Present

- Frontend lead on the team behind the enterprise software that lets Clover hardware run sports and entertainment venues
- Leading a team of 5 on a modernization: porting a Node 10 / AngularJS 1.x app to Node 24, React, and Next.js
- Maintain the microservices and Rails monolith behind the platform
- Stack: Ruby on Rails, Angular, React, Node.js, Express, Koa, AWS Lambda, Serverless Framework

Rooster Teeth Studios

Senior Full Stack Software Engineer

Aug 2023 – 2024

- Owned CMS maintenance and feature development in Ruby on Rails
- Owned SEO optimization across Rails, React, and Express
- Team Docker expert
- Frontend maintenance and feature development

Senior Frontend Software Engineer III

Aug 2021 – Aug 2023

- Feature development, performance optimization, maintenance, DX, and refactoring on an Express and React app

H-E-B Digital

Senior Software Engineer

Jan 2021 – Jul 2021

- Contributed to an internal supply chain platform replacing a legacy mainframe
- Worked with Angular, RxJS, Python, PostgreSQL, and Node.js
- Optimized CI/CD pipelines
- Agile team of 5 engineers with 2-week sprints and continuous delivery

Apple

Front-End Web Developer (Contractor)

Jan 2019 – Nov 2020

- Project lead: built and launched a public-facing web app for WWDC from scratch in 3 months
- Built with React, Redux, Webpack, styled-components, and ES6
- Individual contributor on an internal-facing site for an internal Apple product
- Delivered pixel-perfect implementations from design mockups
- Mentored junior developers

Bright Health

Front End Developer (Contractor)

Aug 2018 – Nov 2018

- Refactored and launched healthcare marketing and enrollment sites in React and Redux
- Built reusable components for a shared React UI kit
- Worked on the WalmartLabs stack: Electrode, HapiJS, React Router, Node.js

Elliot

Full Stack Engineer (Contractor)

Apr 2018 – Jun 2018

- Built features for a functional Node.js API with HapiJS, MongoDB, and Mongoose
- Built the customer web portal in React, Redux, Ramda, and Webpack

MeUndies

Fullstack Software Engineer

2017 – 2018

Tanga

Full Stack Engineer

Apr 2016 – Aug 2017

- Full-stack e-commerce work across AWS, microservices, React, Lambda, Python, and Rails
- Moved multiple services from Heroku to AWS OpsWorks with Chef
- Built serverless apps with AWS Lambda and API Gateway
- Implemented continuous deployment for multiple web apps
- Found and fixed performance bottlenecks

Datafiniti

Full Stack Platform Engineer

Apr 2014 – Apr 2016

- Built the customer search interface for the Datafiniti V3 API in Rails and React
- Built the customer interface for the 80legs V2 API in Rails and jQuery
- Wrote Chef automation for every project
- Provisioned and deployed production servers on AWS with continuous integration
- Integrated marketing automation and Salesforce into the stack

ProctorCam

Software Support Engineer

Feb 2012 – Aug 2012

- Wrote a feature test suite (Capybara, Selenium, Cucumber) for an untested codebase
- Identified and fixed user-facing bugs; provided QA for releases

Side projects

GoodParts	A voice journal informed by Internal Family Systems. Talk through your day, and it maps the parts of you that keep showing up over weeks.
Simple Rituals	A daily routine app that doesn't keep score. It shows one thing: the next ritual for the part of the day you're in.
CardioEngine	Heart-rate zone training built from your aerobic threshold instead of an age-based formula.
PlayaOS	Free camp management for Burning Man theme camps: rosters, applications, dues, shelters, shifts, and kitchen operations in one branded portal.
Waffles & House	A Burning Man theme camp built on fresh waffles and house music. The site and companion apps take applications to join.
